- **User Module:** Enabled user registration, login, product search, and display functionalities.
- Utilized **JDBC** for secure database interaction and CRUD operations with a **MySQL** backend.
- Followed OOP principles for modular, reusable, and maintainable code.
- Download

TRAINING

Q/JSpider ⬀   **06 2024 –**
Java Full Stack   *Noida,India*

- Java Application **Developed and maintained .**
- Developed and maintained Java-based web applications.
- Tested and debugged application features.
- Optimized database queries for better performance.

TECHNICAL SKILLS

Languages: Java, JavaScript, SQL, NoSQL
Developer Tools: VS Code, Intellij Idea , postman
Technologies/Frameworks: GitHub, ReactJS,NextJS, Git, MongoDB

CERTIFICATIONS

- Developed and maintained Java-based web applications.
- MongoDB Basics
- Git Command Line - Coursera
